Based on recent performance trends, Mebuki Financial Group Inc. announces that it has revised the consolidated earnings forecast and the year-end and annual dividends forecast for the fiscal year ending March 31, 2025, which were announced on May 10, 2024.

## 1. Revision of consolidated earnings forecast for FY2024 (From April 1, 2024 to March 31, 2025)

#### (1) Revision

	Ordinary profit	Net income attributable to owners of the parent	Net income per share
Previous forecast (A)	¥Billion	¥Billion	¥

(Reference) Results of FY2023	63.042	43.366	41.66

#### (2) Reason for the revision

We revise up the earnings forecast for the fiscal year ending March 31, 2025, because we expect that the full-year earnings will exceed the initial forecast, due to an increase in interest income on loans and securities income, as well as the strong performance of corporate customer services, etc.

#### (2) Reason for the revision

We expect that net income attributable to owners of the parent for the fiscal year ending March 31, 2025 will exceed the previously announced forecast. Therefore, based on our shareholder returns policy, with a target total return ratio of 40% or more, we determined to increase the year-end dividend by  $\frac{1}{2}$  2.0 to  $\frac{1}{2}$  9.0 per share (the annual dividends are estimated to be  $\frac{1}{2}$  16.0 per share, an increase of  $\frac{1}{2}$  2.0).
